**REQUEST FOR CORRECTED PATENT APPLICATION PUBLICATION**

Dear Sir or Madam:

Applicants hereby respectfully request the re-publication of the above-referenced patent application in order to properly reflect the complete Specification, including drawings, as filed.

The above-referenced patent application was published as Pub. No.: 2007/0003876 A1 on January 4, 2007. However, the publication failed to include the majority of the specification and does not include any of the drawings. The initial U.S. National Stage filing for this application, which took place on October 21, 2005, included a certified English language translation of International Application PCT/EP2004/002822 having a total of fourteen (14) pages as well as two sheets of drawings containing Figures 1-6. The papers filed on October 21, 2005, also included a certified English language translation of the Amended Pages from the International

Application, under PCT Article 19. At the end of Amended page 3, Applicants directed in a parenthetical that the remainder of the specification was "Continued on page 2, line 17 of the translation of the original PCT text." While the published application included the content of the Amended Pages, it failed to include the remainder of the specification (page 2, line 17 through page 9, line 18) and the drawings.

The printed publication contains material errors made by the Patent Office. Accordingly, Applicants hereby request correction and re-publication of the pending application. This request is being made less than two months from the publication date of the subject patent application publication and it is believed that no fees are due. If any fees are due, please charge our deposit account, No. 08-2461 for such fees.

Respectfully submitted,

/Tony A. Gayoso/
